

ADITYA KUMAR

Backend / Full-Stack Engineer | Python & Django

Bengaluru, India • +91 6202393823 • aadi0211kumar@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

- Software Engineer with 2+ years of experience building Python-based backend, data-processing, and full-stack applications for enterprise clients. Experienced in designing REST-oriented services, PostgreSQL/Oracle-backed data workflows, CI/CD pipelines, containerized deployments, and end-to-end feature delivery from data access through UI. Automated critical data pipelines saving 40+ hours/week and reduced query latency by 45%. Strong foundation in Python, Django, JavaScript, SQL, Java, C++, Firebase, Docker, and AWS Lambda-based cloud delivery.

CORE TECHNICAL SKILLS

Backend: Python, Django, REST API Design & Integration, SQL, PostgreSQL, Oracle DB, Firebase

Frontend: JavaScript, UI Development, Full-Stack Development, MVC Architecture

Architecture & Data: API Integration, Business Logic Design, ETL / Data Pipelines, Data Processing, Application Data Modeling

DevOps & Cloud: CI/CD, Docker, Git, AWS Lambda, AWS EC2, Cloud Deployment, IoT Core, Oracle Cloud Infrastructure (OCI)

Programming: Python, Java, C++, SQL, R

PROFESSIONAL EXPERIENCE

Genpact — Data Scientist, Bengaluru, India Aug 2024 – Present

Backend & Data Platform: Built a Python-based enterprise analytics application that extracts and filters PostgreSQL data by attribute value, time period, and geography; processes syndicate and custom-attribute files; generates consolidated reports; applies client-specific recoding; and executes CDT-tree generation using DirMult modeling, switching constants, and hierarchical clustering.

Full-Stack Ownership: Designed and implemented application UI and backend integration, connecting frontend workflows to Python data-processing services and analytical pipelines; developed REST-oriented components and owned end-to-end feature delivery from data access and business logic through user interaction.

DevOps & Cloud Delivery: Built and maintained CI/CD pipelines, containerized application dependencies with Docker, and deployed production workflows on AWS Lambda, improving release velocity and deployment consistency.

Reliability & Automation: Automated data preprocessing, validation, and pre-QC workflows, saving approximately 40 hours/week and improving operational reliability of downstream reporting systems.

Genpact — Data Analyst Intern, Bengaluru, India Jan 2024 – Jun 2024

Optimized complex SQL queries on Oracle DB, reducing dashboard data-fetch latency by 45%.

Built KPI dashboards using Power BI and Tableau, translating backend data into business-facing reporting tools.

SELECTED PROJECTS

BuyMe – E-Commerce Web Platform: Developed a full-stack e-commerce application using Django, JavaScript, and SQLite with user authentication, order management, REST APIs, and modular MVC architecture.

LLM-Based Analytics Agent (Internal POC): Built a Python application orchestrating LLM prompts, dataset tools, multi-step reasoning, and memory-based context for automated analytical insight generation.

We-Care – Android Healthcare App: Built an Android application with a Firebase backend supporting appointment scheduling and digital health records, including data sync and REST-style service calls.

EDUCATION

RV Institute of Technology and Management — B.E., Computer Science 2020 – 2024

GPA: 8.04 / 10

CERTIFICATIONS

Lean Six Sigma Green Belt — Genpact

Machine Learning, Data Science and Generative AI with Python — Udemy

Natural Language Processing with Python — Udemy

Oracle Cloud Infrastructure (OCI) AI Foundations — Oracle University

Python Data Structures — University of Michigan (Coursera)

ACHIEVEMENTS

LeetCode Rating: 1835 (Top 6.3% globally); Qualified for Google Code Jam (Rank 71/100 in round)

Co-Lead, Competitive Programming — Google Developer Student Clubs (DSC), RVITM
1st Place, CODE BATTLE and 2nd Place, CODM — Phoenix Robotics Club
