Software Development Engineer with 2+ years of experience building scalable backend services, robust APIs, and intelligent application frameworks. Proven track record in optimizing database performance, implementing CI/CD pipelines, and integrating modern AI tools into production workflows.

EXPERIENCE

Genpact

Aug 2024 – Present

Software Engineer

Bengaluru, India

- Architected and implemented a robust application framework for intelligent insight generation across enterprise client workflows.
- Built an end-to-end processing pipeline using Python that handles raw data, automates execution, and deploys the final service on AWS Lambda for production use.
- Integrated CI/CD pipelines to automate benchmarking, validation, and deployment processes.
- Developed automated validation and pre-QC checks using Python, saving approximately 40 hours per week in operational overhead.
- Engineered backend models for customer segmentation and behavioral analysis, improving targeting efficiency by 20%.

Genpact

Jan 2024 – Jun 2024

Software Engineering Intern

Bengaluru, India

- Optimized complex SQL queries on Oracle DB, reducing data-fetch latency by 45% for enterprise applications.
- Built and maintained internal tracking tools and KPI dashboards to monitor system health.

PROJECTS

BuyMe - E-commerce Web Platform

- Developed a full-stack e-commerce platform using Django, JavaScript, and SQLite, featuring user authentication and comprehensive order management.
- Built REST APIs following a modular MVC architecture to ensure scalable backend services.

We-Care - Android Healthcare App

- Built a mobile application for Android backed by Firebase to support appointment scheduling and digital health record management.

Robo Weed - IoT Agricultural System

- Built a Raspberry Pi-based rover system integrating real-time detection and automated hardware control.
- Implemented efficient processing pipelines using Python and IoT sensors to achieve high-accuracy detection and response workflows.

LLM-Based Application Agent

- Engineered a goal-driven agent system to automate reasoning workflows using Python and prompt orchestration.
- Implemented multi-step logic, tool usage, and memory-based context handling aligned with modern software design patterns.

EDUCATION

RV Institute of Technology and Management

2020 – 2024

B.E., Computer Science (GPA: 8.04)

Bengaluru, India

SKILLS & ACHIEVEMENTS

Languages : Python, Java, C++, JavaScript, SQL, HTML/CSS

Tools & Frameworks : AWS (Lambda, EC2, IoT Core), Firebase, Docker, REST APIs, Django, SQLite, Git, Oracle DB, Cursor, OpenAI/Anthropic APIs

Achievements : LeetCode Rating: 1835 (Top 6.3%); Qualified for Google Code Jam (71/100); Co-lead Competitive Programming at Google DSC RVITM
